#### SRS - scale

This questionnaire is about how you evaluate how others behave towards you in different circumstances, and how you feel in some situations. In doing so, you should circle one number on a scale from 1 to 5, where 1 means that it never applies to you, that is, it does not describe you at all, and 5 always refers to you. If the question hardly ever applies to you, you will circle number 2, and if it sometimes concerns you, number 3 if it quite often applies to you, you will choose number 4.

#### **PISQ**

This questionnaire is relates to your assessment of how involved your parents are in your sport activities, whether they give you advice, whether they come to matches, whether they support you, or whether they cooperate with coaches. As in the previous questionnaire, you answer each question by rounding up a number from 1 to 5, to indicate which response best reflect how you feel about the behavior of your parents or someone other who takes care about you (caregiver, guardian?), where 1 indicates that the item does not refer to your parents' behavior at all, and 5 to fully describe your parents.

You need to evaluate each parent, mother (on the left) and father (on the right) separately for each question. If you have only one parent, then you only do the assessment for that parent. Also, if you have a guardian or other person who cares about you, you will make an assessment for that person, by writing in relation to that person only in the first question and deleting the person who is not the subject of your assessment. In this case, please feel free to contact the person who conduct this survey to give you more detailed instructions on how to complete this questionnaire.
